

EPSILEN

EPSILEN REQUIREMENTS

Steve Hunsinger

EPSILEN REQUIREMENTS

Architecture

Epsilen is a centrally hosted environment developed with using Microsoft .NET technologies utilizing a clustered SQL Server database.

EPSILEN REQUIREMENTS Architecture

Epsilen is developed using a service-oriented approach allowing for distributed processing of the presentation, service, and data layers.

EPSILEN REQUIREMENTS

Backup

Epsilen follows industry standards in providing regular backups of both database and files. These backups are stored and tested regularly in an off-site location.

EPSILEN REQUIREMENTS

Web Addresses

Epsilen utilizes three web addresses which will need to be cleared through institution firewalls to ensure delivery.

- <http://www.epsilen.com>
- <http://epsilen.com>
- <http://image.epsilen.com>

EPSILEN REQUIREMENTS

Email

As Epsilen is a centrally hosted system, all Epsilen forwarded mail originates from a single location. The following email location must be white listed.

- mail@epsilen.net (IP: 65.182.188.10)

EPSILEN REQUIREMENTS

Email

As Institutions will potentially have hundreds or thousands of emails a day from Epsilen, the following IP addresses should be added as spam filter exceptions.

- 207.191.224.2
- 207.191.224.69
- 207.191.224.71
- 207.191.224.72
